

Remarks

The specification has been amended to incorporate United States Patent and Trademark Office recommended headings and subheadings, and to conform the specification to U.S. practice. The claims have been rewritten in U.S. format, eliminating multiple dependent claims. An Abstract has been added.

It is noted that the PCT Examining Authority found the claims to be novel, to meet PCT inventive step requirements, and to have utility. Early favorable consideration is respectfully requested.

Respectfully submitted,

Henk Mosseveld et al.
